

Wafer-ball valve in stainless steel electrical actuator type EK07

description:

Wafer ball valve made of stainless steel with electrical actuator to shut off pipeline systems.

features:

- suitable for neutral and not neutral **gaseous & liquid media**
- ETL electronic torque limiting
- AVS automatic voltage sensing
- ATC automatic temperature control
- emergency operating
- visual position indicator

connection:

DN15 – DN100

construction:

Full port design

pressure:

0 – 16 bar

design:

body:

ball valve with electrical actuator

ball:

stainless steel 1.4408

ball seal:

stainless steel 1.4408

packing:

PTFE + TFM

nominal diameter:

PTFE

temperature:

short

generally -20°C to +180°C (depending on working pressure)
(more than +70°C coupler + bracket must be used)

body actuator:

corrosion resistant synthetic body

plug connection:

external acc. to DIN 43650

temperature:

generally -20°C to +70°C

mounting pad:

acc. to ISO 5211

power supply:

Actuator L 24V AC/DC – Low Version

Actuator H 110-240V AC/DC – High Version

Actuator S 24-240V AC/DC

mounting position:

free, not upside down

drawing:

dimensions:

*actuator size for greasing mediums, (for non-greasing mediums on request)

Please note:

Actuator must be bigger, if used with non-greasing media (e. g. water). Please contact us for a configuration.
